Frontend Engineer with 5+ years of experience building web applications using Vue.js, Nuxt.js, and TypeScript. Experienced in frontend architecture, multi-tenant systems, reusable component libraries, and developer experience improvements. Built and maintained dashboard, RBAC authentication systems, internal design systems, and high-performance admin platforms for government and enterprise environments.

PROFESSIONAL EXPERIENCE

Frontend Developer | Transtrack (PT Indo Trans Teknologi) - Bandung, Indonesia

April 2025 - Present

- Architected a multi-tenant modular SPA using Nuxt 3 and TypeScript, serving multiple business domains from a unified codebase.
- Implemented subdomain-based routing with granular RBAC authorization and Keycloak SSO integration.
- Developed interactive operational dashboards using Leaflet.js and Chart.js for fleet and monitoring visualization.
- Built and maintained Transtrack UI, a reusable internal design system and component library using Nuxt 3 and Tailwind CSS.
- Established Storybook as the central component playground and documentation platform to improve frontend collaboration and consistency.
- Published and maintained an internal NPM package containing 48+ reusable components used across company products.
- Developed a custom CLI tool (npx transtrack-ui add) to streamline component scaffolding and integration workflows.
- Rewrote frontend of a driver safety monitoring platform using Nuxt 3.
- Integrated real-time anomaly detection APIs while preserving existing operational workflows and improving data presentation reliability.

Junior Frontend Engineer | Jabar Digital Service - Bandung, Indonesia

September 2022 - March 2025

- Developed and maintained internal government administration features including RW management, push notifications, ticketing systems, and CMS modules (Sapawarga Admin).
- Built complaint management features used by regional government organizations (OPD) to process and verify citizen reports.
- Implemented user support workflows including account verification, password reset, and complaint tracking with Web View (Sapawarga Web).
- Migration and rewrite of Sapawarga Admin v2 using Nuxt 3, improving maintainability and performance by decoupling legacy systems.
- Contributed to the development of the SIDEBAR (Sistem Informasi Dokumen Elektronik Jawa Barat) application by building the *Tindak Lanjut* feature, streamlining the workflow for replying to and forwarding official electronic document and Supported the User Management module by handling account modifications and role assignments to maintain secure and accurate access control across the system.
- Developed and maintained the Labkes web platform, a specialized portal for doctors to create medical referrals, issue prescriptions, and access comprehensive medical histories for patients registered via Sapawarga.
- Developed frontend interfaces for executive dashboards integrated with backend LLM services for dynamic insight visualization.
- Developed internal platforms including URL shortening services and mock API tools to improve frontend-backend collaboration and development efficiency.
- Optimized code performance using SonarQube and improved web performance through Lighthouse analysis.
- Conducted research and implemented innovations, including Unleash for feature flagging, unit testing, and data tracking improvements (Google Analytics).
- Conducted regular maintenance to ensure system stability and security.
- Served as a mentor for interns, guiding them in developing the Ticket Management System and conducting code reviews.

Fullstack Engineer | PT Kreasi Rekayasa Indonesia - Bandung, Indonesia *November 2019 - August 2022*

- Developed and maintained Ticketing Online System and Bignet, ensuring optimal system performance.
- Developed and maintained Man-IC, a project for storing research papers, modules, learning materials, and articles to facilitate organized content management.
- Developed and supported EZ Track, a GPS-based vehicle monitoring system, including features for adding and managing users efficiently.
- Engaged directly with clients through regular meetings, discussing project development, updating features based on requests, and ensuring solutions align with user requirements.

SELECTED PROJECTS

Bimasena Abadi Land

Freelance Project

- Developed a CMS and client website for a housing vendor, enabling efficient property management and customer interaction.

CV IDES

Freelance Project

- Built a CMS and client website for an electrical engineering company to showcase its corporate portfolio and services.

E-Assessment

Freelance Project

- Developed a student assessment system, allowing educators to evaluate student performance based on predefined indicators.

Bank Syariah Indonesia (BSI)

Freelance Project

- Developed CMS for administrators and a user-facing application.

IKA-FK

Freelance Project

- Developed a digital documentation system for the alumni of the Faculty of Medicine, enabling structured data storage and easy access to alumni records.

Shayna Admin

Personal Project

- Developed an admin dashboard for an e-commerce platform, enabling product management, order tracking, and transaction monitoring with an intuitive UI.

Kulineran

Personal Project

- Built a food ordering platform where users can browse menus, place orders, and manage transactions efficiently.

Shayna Shop

Personal Project

- Developed a modern e-commerce website, featuring a product catalog, shopping cart, and secure checkout process to enhance the online shopping experience.

TECHNICAL SKILLS

Frontend: Vue.js, Nuxt.js, TypeScript, JavaScript, Tailwind CSS, Chart.js, Leaflet.js

Backend: Node.js, Express.js, Laravel, PHP, CodeIgniter

Tools & Platforms: Git, Storybook, SonarQube, Unleash, Figma, ClickUp, Keycloak

Architecture & Concepts: RBAC, Multi-tenant Architecture, Design System, Component Library, REST API Integration, Feature Flagging, Performance Optimization

EDUCATION

UNIVERSITAS ISLAM NEGERI SUNAN GUNUNG DJATI Bandung, Indonesia

Bachelor of Engineering, Electrical Engineering 2014 - 2018
